Power Output Guarantee

High Power Output

MBB technology reduces the distance between busbars and finger grid lines, improving reliability and increasing output

ZERO LID (Light Induced Degradation)

N-type solar cell has no LID naturally, can increase power generation

Lower LCOE

High power and 1500V system voltage, saving **BOS** cost

Better Weak Illumination Response

Wide spectral response, higher power output evenunder low-light settings like smog or cloudy days.

Better Temperature Coefficient

Higher power generation under working conditions, thanks to passivating contact cell technology

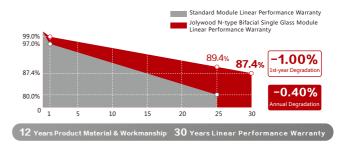

Outstanding visual appearance

Designed with aesthetics in mind, thinner wires that appear all black at a distance
